Taxation in the Netherlands

Protocol Amending Tax Convention with the Netherlands

The book summarizes the main features of the Netherlands tax system. It provides foreign investors and business people with basic information on the tax implications of their business plans in the Netherlands. The various chapters deal with the General Tax Act, individual income tax, corporate income tax, wage tax, the social security system, dividend withholding tax, VAT, estate tax, gift tax, transfer tax, insurance tax,
Analyzing Taxation and Labour Market with an AGE Model for the Netherlands This paper looks at capital income taxation in the Netherlands from an international and domestic perspective. The Netherlands is a major conduit country for FDI. Recent reforms taken by the Dutch authorities as well as public statements represent a strong move to address international tax avoidance, but it is too early to be able to detect the impact in the data, and measuring tax avoidance even in the past is fraught with difficulties. Domestically, the unique system, which for many financial assets effectively taxes wealth rather than capital income, leads to inequities and distortions. Owner-occupied housing is strongly tax-favored and in many cases effectively subsidized. Various reforms, not necessarily of a fundamental nature, would improve efficiency and equity.

Fundamental Tax Reform in the Netherlands

Taxation in the Netherlands Antilles The Dutch tax system distorts economic decisions, treats equal economic positions unequally for tax purposes, and is extraordinarily complex. Following in the footsteps of the Mirrlees Review, prominent economists from academia and the policy arena, at home and abroad, provide independent, evidence-based analyses of the system’s shortcomings, as well as detailed proposals for reform. Tax by Design for the Netherlands spans the whole spectrum of taxes on labor and capital income, profits, consumption, wealth, inheritance, and charges to correct for market and individual failure, including the environment.

Notification by the Netherlands Government with Respect to the Netherlands Antilles Corporate law is the heart of legal practice concerning foreign investments, business operations and rep-offices in The Netherlands. This book provides all the necessary details. Written by Steven R. Schuit, partner in the international law firm Allen & Overy, Amsterdam office, it has now been revised and updated by Barbara Bier, a longstanding expert as a deputy civil law notary. The relevant chapters on works councils and taxation were written by other Allen & Overy partners, who also have a background of advising business clients over a long period of time. This book is indispensable for business executives, accountants, lawyers, tax consultants, and business advisers. It is also now being used by several Dutch universities for their foreign students program. The cumulative index and the table of contents contribute greatly to its usefulness.
